I have extensive experience as a Programmer and DBA supporting
Corporate Finance and Tax groups for several large corporations.

Areas of support include:

- General Ledger, Financial Reporting, and Corporate Hierarchy
- Research and Development Tracking System
- Sales Tax & Reporting and Tax Audit Support
- Customs Reporting and Audit Support
- Accounts Payable and Project Tracking
- Corporate Inventory, Aging, and Scrap
- Specialized Reporting off of Corporate Data Warehouse
- Telephone and Communications Billing
- Corporate Mergers and Divestitures

I have experience with many different relational databases, including
DB2 (16 years), Sybase (5 years), Oracle (13 years), and MySQL, 9
years.

Programming experience includes SQL, HTML, PHP, Perl, Python,
Javascript, FTP, PL/SQL, XML, COBOL, JCL, REXX, and more working on
many platforms including Linux/Unix and IBM Mainframe.

My specialty is in providing custom solutions to complex multi-platform
systems.

I have vast experience working in a Corporate Data Warehouse
environment supporting the ETL process for several databases.

I am confident that I would be a valuable asset to your company.
